MEMORANDUM FOR: Director of Communications
: Director of Data Processing
FROM : [REDACTED]
: [REDACTED]
Services Staff, DDO
SUBJECT : DDO CDS Traffic Requirements

1. The OC/ODP CDS communication link is currently expected to become operational early in calendar year 1977. At that time OC will begin to transmit to the ODP General Center all electrical traffic identified by ODP and customer offices. The purpose of this memorandum is to identify the traffic that is of DDO interest and to request ODP action to capture that digital traffic.

2. At the present time, the Cable Secretariat screens DDO operational traffic and, in response to Distribution Requirements Letters, identifies that traffic that is to be routed to [REDACTED] either for action or information. It is that traffic, i.e., that which includes [REDACTED] as an addressee, that should be identified for inclusion in the CDS digital stream. It is understood that this traffic will include the CDS identification symbol "OJCS-D" or "ODP-D", which will be the only unique identifier by which ODP processing programs can recognize the intended recipient.

3. A study of incoming and outgoing DDO operational cable and telepouch traffic has indicated that the total traffic per weekday is expected to [REDACTED] es, with an average length of approximately [REDACTED] per message. We request that ODP store this traffic on magnetic tape, thus allowing DDO [REDACTED] personnel to transport tapes from the General Center to the Special Center for further processing and storage.

Approved For Release 2005/07/14 : CIA-RDP84-00933R000200210010-8

4. I have asked my to designate an appropriate team to coordinate with members of your offices to evolve mutually attractive ways to meet our requirements.
